

CHÂTEAU MARIS ROSE DE NYMPHE EMUE 2020

WINE INTRODUCTION

The Cuisse de Nympe is a type of rose, a very pale colored rose tending slightly to mauve. It was brought to France at the end of the 16th century, from the Crimea. This Languedoc rosé is pressed directly without contact with the skin, revealing a fleshy pink color worthy of a “Cuisse de Nympe”.

WINEMAKING NOTE

Our Rosé is pressed directly without being in contact with the skins and is fermented in concrete vats.

APPEARANCE, AROMA AND TASTING NOTE

A pale rosé offering delicate notes of small red and citrus fruits. Its roundness and acidity make it perfect to accompany picnics, salads and barbecues.
